

It is the aim of the Quality Management System (QMS) of Reddy Architecture + Urbanism to provide its clients with a high-quality service within the scope of "Architectural, Interior Design, Master Planning, Project Management and Project Supervisor for Design Process (PSDP) Consultants".

To meet customer needs and expectations, a Quality Management System, in line with the ISO 9001:2015 Quality management standard, has been implemented. A dynamic approach has been developed to meet our client's ever-changing needs and requirements.

Reddy Architecture + Urbanism is committed to improving the quality of its operations through continually improving its processes and services. We strive to recommend good quality, sustainable products for use in the design, construction, maintenance and operation of our clients' construction projects.

Reddy Architecture + Urbanism have used risk assessments to identify the risks inherent within our business and processes to ensure that established controls are in place to eliminate and reduce these risks. Our objective is to ensure a safe and sustainable work environment for all staff to allow them to focus on producing high quality design to meet our customer requirements. Staff at Reddy Architecture + Urbanism, are, aware that if a failure occurs within their area of responsibility, it may result in re-work, pollution, injuries or fatalities.

Any risks identified are mitigated through the establishment of working procedures, improvement objectives and the subsequent implementation of these procedures and improvements across the management system.

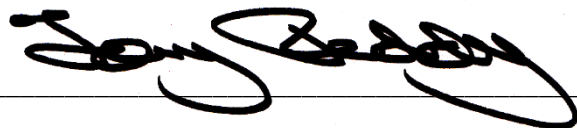

It is the policy of Reddy Architecture + Urbanism to comply fully with the current Local Authority and National legislation and regulations and any applicable business and industry specific regulations.

This policy is reviewed by the Senior Management team at least annually.
